

presto Acrylic-Scratch-Remover

Technical Information

Surfaces made of acrylic and Plexiglas® such as headlights, windows in convertibles, caravans or caravans, windshields, speedometer covers or burl wood trim strips scratch very easily and thus lose their good appearance and value.

With the presto Acrylic-Scratch-Remover, these scratches can be removed easily and quickly: New from old! Thus, an expensive repair, or even replacement, can often be prevented.

Ord.-no: 430114

Quality & properties

Reliably removes scratches from acrylic and Plexiglas® surfaces of the car, motorcycle, caravan, boat, furniture etc
Quick and easy application
All-inclusive kit contains everything required for application

Physical & chemical data

Colourname: white
Minimum Working Temperature: 5 °C
Maximum Working Temperature: 30 °C
Flash point: 270 °C
Storage stability: 3 y
Content: 50 G

How to use

Clean the surface and apply a little paste.
Using a soft, clean cotton cloth or pad polish the scratched areas using heavy pressure for 2-3 minutes. Do not use on any printed, varnished or coated surfaces.
For deep scratches repeat application several times.
Remove residue with a cloth.
Very deep scratches should be treated beforehand with special abrasive paper (granularity: 1500) and a little water.
Polish afterwards with presto Acrylic Scratch Remover.
Warning: Do not use on any printed, varnished or coated surfaces. Do not use on Polycarbonate (PC). To be on the safe side, first test the polish on an unexposed surface.

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of May 7, 2025 – This release replaces all eventually earlier issued versions.
