- semi gloss
- high gloss

Surfaces: plastic parts in motor vehicles
Minimum Working Temperature: 5 °C
Maximum Working Temperature: 30 °C
Flash point: n.a.
Storage stability: 10 y
Content: 600 ML

How to use

Bring the can to room temperature / Operational temperature 5 to 30°C.
Shake before use.
Application "highgloss / semi-gloss": Apply the Cockpit-Spray on a dry, clean cloth and distribute evenly over the surface to be treated.
Then, polish with a dry cloth until a gloss has been achieved.
Application "Superfoam": Apply the cockpit spray and allow to take effect so the foam can break. Then polish with a dry cloth

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of May 7, 2025 – This release replaces all eventually earlier issued versions.
