

presto Chain Spray

Technical Information

presto Chain Spray provides a unique combination for long-lasting lubrication for all chain-driven means of transportation and equipment. The lubricant is very adhesive and is therefore suitable for fast moving and heavy-duty chains such as the one in (cross) engines. In addition it is dilatant (opposite to thixotropic) and therefore prevents the oil dripping from the chain even when moving at high speed.

Application areas:

For all types of chain drives such as bicycles, motorbikes, mopeds, farm machines, in ships, car repair workshops or maintenance workshops.

Ord.-no: 306390

Quality & properties

- Prolongs chain life
- Prevents the wear and clamping of chains
- Transparent lubricant
- Dirt repellent
- Oil with grease properties
- Very low friction efficiency
- Resistant to effects of weather
- Very stable and adhesive
- O-ring safe
- High pressure resistant

Physical & chemical data

- Base: Synthetic oil
- Colourname: yellowish-transparent
- Surfaces: chain drive
- Minimum Working Temperature: 5 °C
- Maximum Working Temperature: 30 °C
- Flash point: n.a.
- Storage stability: 10 y
- Content: 400 ML

How to use

- Bring the can to room temperature.
- Operating temperature 5° to 30°C.
- Shake can for 2 minutes before use.
- Before application we recommend the cleaning with presto Assembly Cleaner.
- Spray chain spray evenly onto chain.
- Has a foamy appearance in the beginning stages when the product can penetrate deep into the treated chain.
- Works like oil, but has the properties of grease.
- Optimum lubrication occurs once the solvent has evaporated (ca. 5 minutes).

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of May 7, 2025 – This release replaces all eventually earlier issued versions.
