

presto Stonechip-underbody Protection

Technical Information

The ideal stone chip and corrosion protection for the underside of your car. Overpaintable, so especially well-suited to visible areas. Forms a tough, elastic coating that protects against stone chips.

The products are available in 500ml spray cans, but also in 1 litre spray gun cans in various colours.

Ord.-no: 603222, 603215, 306031, 306024

Quality & properties

- Excellent corrosion protection
- Long-lasting elasticity
- Can be painted with the most conventional paint systems
- Sound-absorbing
- Excellent adhesion
- Very resistant to weather influences, splash water and abrasion, also to weak acids and bases

Physical & chemical data

- Base: Special resin
- Colourname:
 - grey
 - black
- Completely dry: 1 h
- Overcoatable: 1 h
- Minimum Working Temperature: 10 °C
- Maximum Working Temperature: 30 °C
- Flash point:
 - -4
 - n.a.
- Storage stability:
 - 5 y
 - 10 y
- Content:
 - 1,00 L
 - 500 ML

How to use

For best results bring can to room temperature.
Operational temperature 5 to 30°C.
Surface should be clean, dry and free of grease.
Shake well before use.
Protect surrounding area carefully from spray mist.
Recommended spray distance: approx. 30 cm.
Application spray can: Shake can before use for approx. 2 minutes, and from time to time during use. Generously apply presto Underbody Protection. After use, turn can upside-down and spray the valve empty.
Application spray gun can: The product is ready-to-use, no thinner necessary. Application with a pressure pot gun with an air-pressure of 2-4 bar. Clean the spray gun with white spirit

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of May 7, 2025 – This release replaces all eventually earlier issued versions.
